Certificates

- Open Source tools for Data Science - IBM Data Science Professional Certificate
- Data Science Methodology - IBM Data Science Professional Certificate

Applications Developed

FINDER   Live | GitHub
- A **full-stack, mobile responsive CRUD app** allowing user to log in and search for restaurants by location and category while giving an option to leave restaurant reviews
- Dynamically rendered content to the **DOM** based on query parameters generated from **React** through **Fetch** request to render a multi-page app
- Created back end using **Node.js** to provide different endpoints to communicate with **PostgreSQL database** using **SQL queries**
- Request restaurant details using **node-fetch** from the Yelp **API** to populate tables in the **database** and send restaurant information to the client

Modus   Live | GitHub
- A **mobile application** that uses the weather & location to customize the mood of the app
- Made **AJAX** calls to 4 different **APIs** such as OpenWeather, IP Geolocation, Pexel, and Quote Garden to retrieve weather, location, photos, & quotes to render to the DOM using **JavaScript** and **Object-Oriented-Programming (OOP)**
- Developed a cohesive **UI/UX design** using **HTML5**, **CSS3** and **Bootstrap4** carousel
- Managed tasks and workflow using Meistertask and deployed application on **AWS server**

Matching Game   Live | GitHub
- A themed card matching game with live statistic tracking and **CSS3** animation
- Built using **JavaScript** and **jQuery** to implement functionality and dynamic **DOM** creating to render cards on the screen, with shuffle and add card matching logic
- Integrated **HTML5**, **CSS3**, and **Flexbox** to design a **responsive game layout** with **mobile-responsive** design in mind to optimize **UX**

Education

University of California Los Angeles, *Bachelor of Arts, Political Science with a Specialization in Business and Administration*
Relevant Coursework: Intro to Programming, Elementary Statistics, Intro to Spatial Statistics

LearningFuze, *Accelerated Full-Stack Web Development Program*
800+ hours programming in a real-world environment with mentorship from experienced senior developers (70+ hours/week programming)
